

QObject

QOpenGLFunctions

GLESSRenderer

```
classDiagram
    GLESSRenderer --> QObject
    GLESSRenderer --> QOpenGLFunctions
```

The diagram illustrates a class hierarchy where GLESSRenderer inherits from both QObject and QOpenGLFunctions. A horizontal line connects the two parent classes, and a vertical line descends from its center to the GLESSRenderer class box. Arrows point from the GLESSRenderer box up to each of the parent class boxes.
